

TOBY CRUST

FULL-STACK ENGINEER — REACT · TYPESCRIPT · PAYMENTS & INTEGRATIONS

Sydney, AU +61 425 843 487 tobycrust@gmail.com toby-crust-portfolio.vercel.app [LinkedIn /toby-crust](https://www.linkedin.com/in/toby-crust)

Full-stack engineer shipping **React** and **TypeScript** products end to end: features across Fabra's SaaS product, a national donation site that raised **\$165,575** through Stripe under broadcast-driven traffic, and a **local-first** task manager that syncs across web, PWA and Android. Three years of owning the backend, integrations and deploys as well as the UI.

SELECTED WORK

SLIK · FIGHTMND

National campaign donation platform

Full-stack build of the donation site for a national fundraising campaign: Stripe payment flow, supporter data capture, and a front end that held up under broadcast-driven traffic spikes.

PEAK CONCURRENT VIEWERS

FABRA · SAAS PRODUCT

Share-design permissions and email validation

Took over a departing senior engineer's workstream mid-flight and shipped share-design permissions and email validation end to end, front and back, in Fabra's core SaaS product.

Internal tooling

SLIK · AI & INTERNAL TOOLING

Slack-to-VM AI Agent & Testing Pipeline

Internal pipeline where non-technical team members request project changes in Slack; an AI agent provisions a virtual machine, applies the change, runs the test suite and alerts me for final PR review and merge.

AI Agents

Slack API

GitHub Actions

CI/CD

Dec 2025 – present

Slik — Software Engineer, Sydney

- Full-stack client web work: Stripe checkout flows, mailing-list and ESP integrations, Netlify deployments and DNS.
- Automated content and data pipelines with GitHub Actions and DigitalOcean Spaces.
- Built internal Slack-to-VM AI agent workflows that turn stakeholder requests into tested pull requests.
- Lead developer on the NT Government AR app, through to App Store Connect and Play Console release.

Oct 2024 – Oct 2025

Fabra — Software Engineer, Sydney

- Built features across Fabra's core SaaS product in React and TypeScript.
- Wrote internal tooling that cut manual steps out of the team's day-to-day backend operations.

Feb – Oct 2024

Bardon Design — Junior Software Engineer, Bangkok

- Worked with the Louis Vuitton team on a gamified e-commerce experience built to lift engagement through interactive shopping.
- Built an interactive AR furniture selection app.

Summers, 2021 – 2023

Software internships — Auckland

- Built a 2D arcade game embedded in the Yuri&Niels site, and an AR Rube Goldberg machine level for GeoArGames.

SIDE PROJECTS

TickyTick — local-first task manager

One React codebase for web, PWA and Android. Offline-first on IndexedDB, synced to Supabase Postgres over a realtime websocket, with Row Level Security per user.

IndexedDB Supabase Postgres RLS

TickyTick assistant — LLM with a human in the loop

Gemini function-calling assistant that only proposes changes; the app validates them and shows them for review before saving.
